

Twas a night in the City, Hark a fire on North Kent

Engines and aerials from around, there went

New chief in command, a 3rd alarm struck

We did this before when Plumly's went up

Engines were putting the 4" down, then Tower 16 made it to town

The fire it caused barrels to pop, some of the crew sprayed with a slop

After awhile the fire was quenched, 3 aerials applied the mighty drench

2 mornings later at it again, another big one on the north end

Coming and going both shifts went; it made a difference this time on Kent

The fire was climbing up in the air; crews knocked it right then and there

Heavy equipment tore it apart, water applied deep to the heart

Now there's just 2 piles of rubble...

This new guy in townmean more trouble?

Time will tell it always does, the way it IS, is not what it WAS

Were lookin' ahead not lookin' back, bring on more fire attack!!!!

These fires took help, we have friends for that

Mutual Aid is scratchin' each other's back

The calls got started in ECC, and other departments helped like PD

Frederick, Shenandoah, and Clarke, they stayed till the end when fill-ins depart
