

Clearing Out Your EKG Transmission Folder

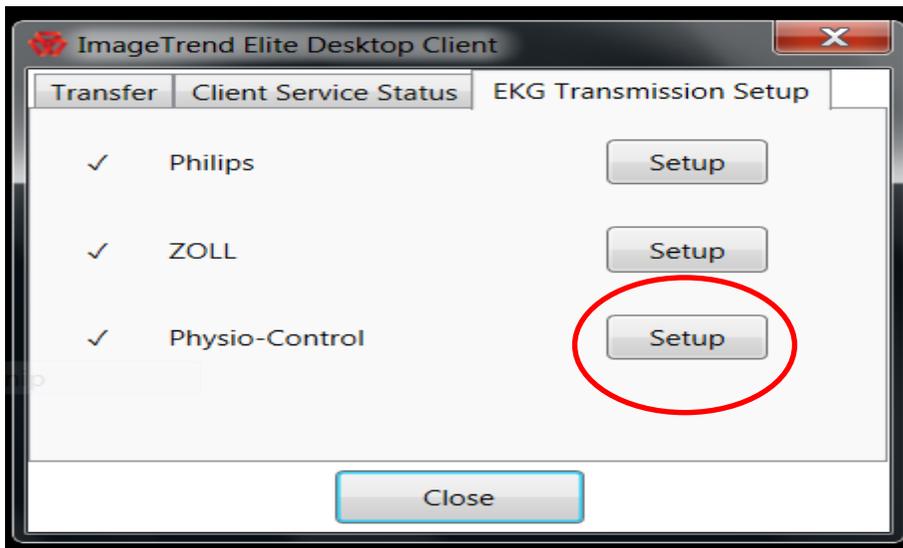

On a daily basis you should be clearing out your EKG Import Folder. I suggest making this a part of your daily routine. This will eliminate having a large number of files to go through when choosing the appropriate file to import. Follow the below steps on each tablet:

On your Tablet:

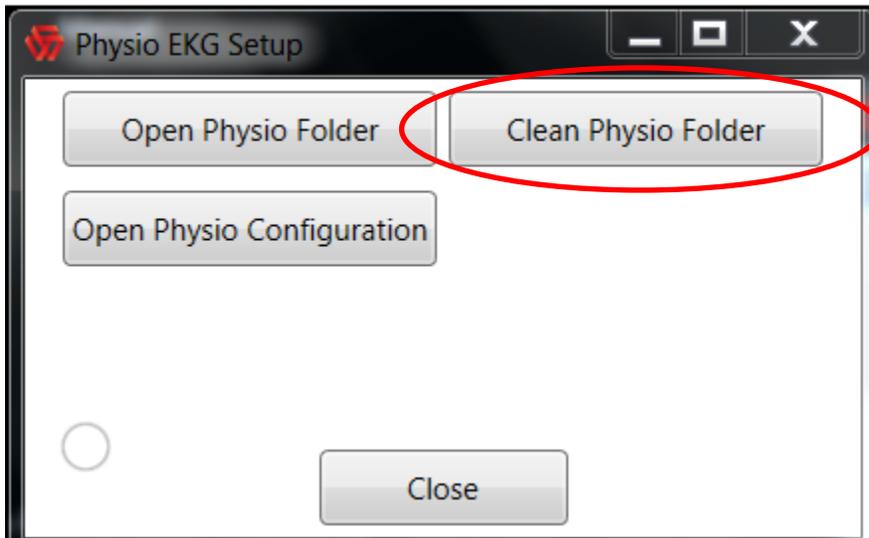

Select Elite Desktop Client:

EKG Transmission Setup

Physio-Control - Setup

Clean Physio Folder

You will get a Confirmation Screen, You will select Yes. This will delete all EKG Imports so you will only see the files you import for that day.
