RE: North End Utility Project  
DATE: September 13, 2011

## **INFORMATIONAL BULLETIN IB-11038**

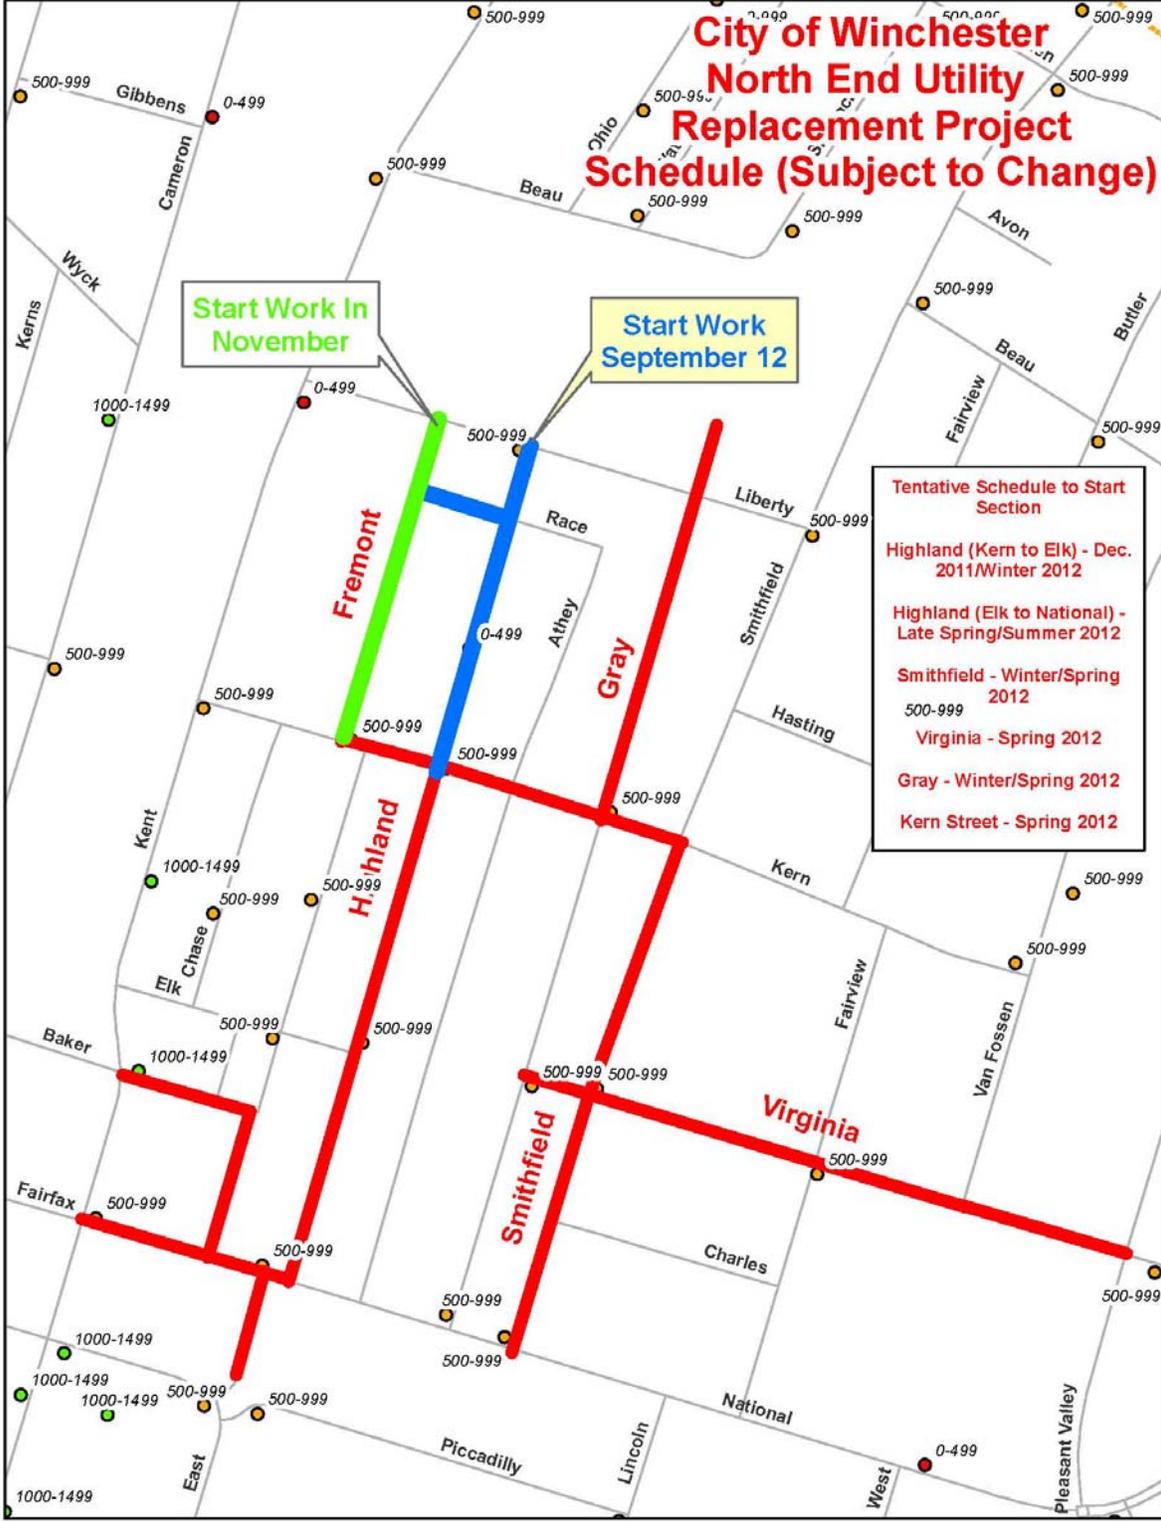

The North End Utility Project is slated to begin on Monday, September 12, 2011. Perry Engineering will be the contractor for this year long project providing upgrades to water and sanitary lines. Sidewalks, curb, gutter and street repaving will be the final phase of this project. Please review the attached map for the tentative dates of each project phases.

Incident responses in these areas will be extremely difficult. First responders will be dispatched to assist on all EMS incidents due to inaccessibility of sidewalks and streets hindering access to incidents with addresses on:

- Highland Avenue from Liberty to Kern
- Freemont Street from Liberty to Kern
- Race Street

The Battalion Officer shall visit the site each day and make contact with the onsite project manager to determine areas of construction and access points. This information shall then be disseminated to the personnel on shift and a general tactical plan should be discussed.
