RE: Amherst Street Utility Project
DATE: April 26, 2012

INFORMATIONAL BULLETIN IB-12015

The Amherst Street utility project is well under way and has created traffic issues for both the Eastbound and Westbound lanes. This project is expected to last until December and traffic has been limited to one lane in each direction.

Personnel shall be mindful of the time of day and the potential for delays in responding to the Western part of the City or transporting patients to the medical center. Routes such as Cedar Creek Grade to 37 North, through the Meadow Branch subdivision or Fairmont Avenue to 522 North to 37 South should be considered as alternate routes.

Good judgment shall be used when considering these alternate routes as to provide the best possible response time for those who need our services.
