INFORMATIONAL BULLETIN IB-12024

TO: All Fire and Rescue Personnel
FROM: Scott Kensinger, Captain
RE: SCBA Cylinder Numbering
DATE: June 21, 2012

To conform to NFPA standards as well as WFRD "SOP 3.1 Respiratory Protection Program", air shop personnel will be visiting each station beginning the morning of July 1, 2012 to number all SCBA cylinders.

This is a necessary process to keep all of the SCBA apparatus in compliance. Please ensure all cylinders are accessible to the air shop personnel so this can be accomplished.

For all new SCBA (South End) the air-shop personnel will need to have access to the NEW SCBA's for database logging and numbering.

If you have any questions, please contact Sgt. Hovermale or EMT/FF Tech Burton at Rouss.
