RE: FH Medic and Field Bridge Software Evaluation
DATE: August 29, 2013

INFORMATIONAL BULLETIN IB-13045

The Department has two pieces of software that we would like to evaluate for use in EMS reporting. Firehouse "FH Medic" and Image Trend "Field Bridge" have been installed to the Panasonic Toughbooks for this evaluation.

Everyone is asked to tryout each of these programs and provide feedback (good and bad). There is no formal process in which to report your findings other than sending us an email. The FH Medic demo will expire in approximately 40 days and you will need to use the following credentials to gain access:

Username: FHguest (case sensitive)
Password: demo
