RE: New Station Computers  
DATE: September 9, 2013

## **INFORMATIONAL BULLETIN IB-13050**

The final configurations are being made to our new station computers. Beginning this week, we will deploy each computer that is in the radio rooms and in the Battalion Chiefs offices.

As part of the future planning process, usernames will be consistent with your terminal services account in which the username will be a combination of the first letter of your last name and then the last four digits of your social security number (i.e. a1234). The passwords will be set the same as the username and you will be required to change it upon your first login.

Please ensure that all data that you want to keep from the old systems has been removed.
