INFORMATIONAL BULLETIN IB-14046

TO: All Fire Department Personnel
FROM: Jeremy Luttrell, Fire Marshal
RE: Westminster Canterbury Construction
Date: August 21, 2014

The expansion project has begun at Westminster Canterbury. The project is currently in the ground breaking phase and is projected to last 30 months.

Right now there are two areas that affect FD operations.

1. Side Alpha, in between buildings 290 and 300, there is a chain link fence. This fence doesn't interfere with any egress points for the building, the FDC is clear and a sign for the FDC has been installed. (See attached photo A & B)
2. Side Charlie, behind the Vitality Center, a chain link fence and two swinging gates have been installed. The FDC for the Vitality Center is behind the fence; however there are no issues with access. (See attached photo C & D)
3. The two gates will be closed but unlocked during working hours; at night the gates will be locked with pad locks. Please see the photos attached, at each gate there has been a KNOX pad lock installed for FD access.

Shockey Construction is the general contractor for this project and has an office in the construction trailer located in the front parking lot of building 290.

Please contact the Fire Marshal's Office with any questions or concerns.
